

„The Story...“

Quinta do Algarvio Village

is a Resort in Carvoeiro, very well located on a sunny spot with distant sea views. It is spaciouly layed out with a pleasant architecture.

Before being built and opened, this place was inhabited by a heard of goats for many years. These were fearless and cheerful, who made this piece of land their home.

When we first visited the site, we were greeted by the goats, standing inside the half-built houses, where curious and followed us everywhere. Even to the first floor where they looked at the horizon, and the distant coastline.

This is how we were inspired, using the goat as a symbol to develop the entire project. Its figure is like an icon of the rural Algarve and the countryside, which meets the sea and the beach, thus the name: Quinta do Algarvio

For this, besides using the goat itself as a pattern, developing a graphic design in it's honour, we used materials that combine the nautical theme with the Algarve countryside.

Colours are used with personality and the textures and finishes make this project, what is intended to be: unique and distinct.
